

B2B SaaS

HQ in Barcelona

Salary: Up to 40.000€ gross/year

Remote friendly

Flexible working hours

Work in a young, dynamic, and multicultural team

Opportunities for growth in an international company

Job Description:

We are seeking a **Frontend Developer** with 2-3 years of experience to work on our B2B SaaS platform, primarily built with **Vue.js** on the frontend and **Python (FastAPI)** on the backend. While your main focus will be frontend development, we value basic backend and cloud skills to help support a versatile and dynamic environment.

Responsibilities:

- Develop, optimize, and maintain dynamic, responsive user interfaces using **Vue.js**.
- Collaborate closely with the design and product teams to translate UI/UX designs into functional code.
- Integrate the frontend with backend services (FastAPI) through REST APIs.
- Ensure cross-browser compatibility and responsiveness across various devices.
- Optimize web applications for performance to ensure a smooth user experience.
- Work in an agile team environment (Scrum/Kanban).
- Occasionally assist in enhancing basic backend functionalities (Python).
- Participate in planning and developing best practices regarding cloud architecture and CI/CD.

Technical Requirements:

Frontend:

- 2-3 years of experience working with **Vue.js**.
- Strong knowledge of **HTML5**, **CSS3**, and **JavaScript (ES6+)**.
- Experience consuming and integrating **REST APIs**.
- Familiarity with CSS frameworks (e.g., **Bootstrap**, **TailwindCSS**).
- Knowledge of web performance optimization and SEO best practices.

Backend (basic):

- Familiarity with **Python** and **FastAPI** or any similar Python frameworks.
- Basic understanding of API structures and RESTful concepts.

Cloud & DevOps:

- Basic knowledge of cloud platforms (e.g., **AWS**, **GCP**, or **Azure**).
- Familiarity with **CI/CD pipelines** and tools like **GitLab CI**, **Jenkins**, or similar.
- General understanding of containers and orchestration (**Docker**, **Kubernetes** is a plus).

Additional Requirements:

- Previous experience working in B2B SaaS companies or similar projects is a **plus**.
- Ability to work in an agile and collaborative environment.
- Strong communication skills, both with technical and non-technical teams.
- Adaptability and quick learning in new technologies.
- Attention to detail and passion for building high-quality products.
