## Experiencie

### July 2019 - Present

#### Memeky | Sofwtare Developer

Skilled in designing and implementing complex APIs for gambling applications, with a focus on advanced financial calculations and transaction management. Proficient in PHP, Python, and JavaScript, leveraging frameworks such as Laravel and Symfony.

### 2018 - 2020

#### Sauleda | Fullstack developer

In my role as a developer specializing in Node.js and JavaScript or PHP, programming is at the core of my day-to-day activities. I devote a significant amount of time to writing and refactoring code to ensure that our web applications are not only functional but also efficient and scalable.

### 2016 - 2018

#### Ikea | Junior Frontend developer

At Revlon, I develop engaging, responsive web interfaces using JavaScript, TypeScript, React, and Angular. I structure content with HTML, style with CSS, and ensure performance with Bootstrap and Next.js, creating seamless, user-centric experiences while staying current with emerging technologies.

### 2015 - 2017

#### Revlon | Backend Developer

As a Senior Backend Developer, I specialize in Node.js, JavaScript, and PHP, building scalable web applications. I use Node.js, Express.js, Laravel, Symfony, ASP.NET Core, and FastAPI to create robust, secure APIs and solutions.

### 2014 - 2015

#### Fundación ginac | Backend Developer

As a developer with experience in PHP and JavaScript, my daily routine is deeply rooted in active programming and solving technical challenges. I spend a significant amount of time writing and optimizing code to ensure that our web applications are robust, efficient, and meet quality standards

## Technical skills

- PHP
- Javascript
- Java
- Html
- Symfony
- Pyhton
- Vue.js
- Angular
- Next.js
- Fast Api
